

Increase Your Productivity with High-Function Coax Workstations – The Decision Data IS-482 and LM-482C!

The Most Efficient, Productivity-Enhancing 3270-Compatible Workstations on the Market!

Decision Data 3270-compatible coax workstations support local attachment to IBM mainframe systems through an IBM 3X74 or compatible controller, IBM 43XX processor, Decision Data Series 4000 Data Communication Controllers, or the IDEA Concert controller family.

- Monochrome and color models available –
 1. Model LM-482C, a Logic Module with keyboard that supports any SVGA color monitor, and
 2. Model IS-482 that includes a green, amber or paper white display.
- Enhanced user productivity. When connected via Decision Data 4000, the IDEA Concert controller family or IBM 3174 controllers, productivity features include:
 - Extended windows-like operation,
 - Copy between sessions,
 - Multiple simultaneous display and printer sessions.
- Low cost, high productivity
- Migration paths for modular units
- Password security
- Host or local printing, parallel port for low cost PC-type printers
- Superior ergonomics, enhanced mouse support
- Free technical support* (see reverse)
- Optional integrated data collection support
- Limited Lifetime Warranty

Productivity is further enhanced via easy-to-use features and optional KIM (Keyboard Interface Module) for bar-code reader or magnetic stripe reader support.
