

Thin client technology in the palm of your hand.

YES^{table} Wireless Thin Client

Overview

The YES^{table} is a wireless, portable, Thin Client, Windows Based Terminal with advanced features applicable to a wide variety of applications. The device provides access to Web-enabled applications, Windows Terminal Services, Citrix Servers and IBM host computers via 5250 and 3270 terminal emulation.

YES^{table} features a bright 8.4 inch TFT-LCD screen with 800x600 resolution, touch screen support and pop-up keyboard in two sizes. Windows, Browser and IBM terminal emulation can be operated using the stylus provided and the pop-up, on-screen keyboard used only when data input is required.

Feature Highlights

- Windows CE 3.0 and Internet Explorer 4.0 with ICA & RDP Terminal clients; YES^{term} 5250e/3270e Emulation Software with Hot Spots and GUI controls for touch screen operation
- Windows Media Player, Java Virtual Machine™, Acrobat PDF and Microsoft Office Suite Viewers
- Email Client
- Pocket Word
- 2.4 GHz wireless communication (IEEE 802.11b, standard)
- Brilliant 8.4" TFT Active Matrix LCD at 800x600 SVGA resolution
- Integrated touch screen display with "on screen" soft keyboard support
- 1 external Compact Flash™ slot
- USB port, with printer, keyboard, bar code scanner and mouse support
- Full 16-bit audio with stereo; headphone jack; built-in speaker and microphone
- Cradle for charging and support
- Quiet and reliable fan-less operation with no moving parts

The answer is
yes![™]

Applications

YES^{table} is an ideal solution for workers in factories, warehouses, and hospitals, or anywhere mobility and real time access to Internet, Intranet, Windows and IBM 5250/3270 applications will improve user productivity.

The tablet includes a larger screen, compared to a PDA, allowing for a pop-up touch-screen keyboard so users need not learn a new handwriting style and can access real-time applications on a wide variety of servers and hosts. The unit weighs only 2.3 pounds and has non-slip rubber handles on both sides with easy access to keyboard and scroll buttons. The user interface is the familiar Windows desktop with icons and push-button controls for all applications, including legacy IBM application programs.

A USB port is provided for attachment of peripherals including keyboard, bar code scanner and printers.

Affirmative Computer Products specializes in Thin Clients for users of IBM AS/400, iSeries, S/390 and zSeries systems. Consequently, the YES^{table} is equipped with TN5250e and TN3270e terminal emulation software that is able to convert green screens to a Windows-like user interface with push button controls for Menus, Function Keys and Sub-file options. This feature is contained within the tablet and requires no changes to the host software.

Specifications

<i>System</i>	High-integration National Semiconductor Geode Processor@300MHz 8.4" TFT Display with Touch Screen (800 x 600) 32 MB Flash Memory and 64 MB SDRAM Wireless LAN and WAN ready. 802.11b Standard USB Support for Keyboard, Printer and Bar Code Scanner Management Tools for updates, monitoring and control	<i>Wireless Network Support</i>	IEEE 802.11b WLAN, standard (Up to 11 Mbps) International wireless WAN options available
